

NEARLY READY FOR BUSINESS

Charity Association Completes
Articles of Incorporation.

FILING WILL BE TOMORROW

SOCIETY IS FOR ALL PERSONS
WORTHY OF ASSISTANCE.

The articles of incorporation of the Salt Lake Charity Association, prepared by Benner X. Smith, were approved at a meeting of the officers and incorporators held yesterday afternoon in the office of Stephens & Smith in the Auerbach building. The officers are: President, Dr. T. B. Beatty; secretary, J. B. Evans; treasurer, M. H. Walker; and those who join with them as incorporators are Simon Ramberger, Rev. E. I. Goshen, F. A. Druehl, Joseph Goshen, W. Montague Ferry, W. H. Tibbals and J. D. Woods.

The objects of the incorporation as set forth in the articles, which will be filed in the office of the secretary of state tomorrow, are:

"First—Every department of its work shall be completely severed from all questions of religious belief, politics and nationality.

"Second—One of its objects shall be to become a center of intercommunication between the various charitable relief agencies in Salt Lake City, to foster harmonious co-operation between them, and to check the overlapping of relief work.

"Third—To investigate thoroughly, and without charge, the cases of all applicants for relief which are referred to the society for inquiry. To render persons having legitimate interest in such cases full reports of the results of such investigation. To provide visitors who shall personally attend cases needing counsel and advice.

"Fourth—To obtain work for needy persons who are capable of being wholly or partially self-supporting.

"Fifth—To discourage the growth of pauperism and grafting by the above means, and by the prosecution of imposters.

"Sixth—To promote the general welfare of the needy by social and sanitary reforms, and by the inculcation of habits of providence and self-dependence.

"Seventh—To undertake the care of all charity cases that are not cared for by some one else.

"Eighth—To thoroughly investigate all cases of persons who apply for or are reported as needing assistance.

"The principal office shall be at Salt Lake City, Utah, with a board of trustees, consisting of ten persons, of whom five shall form a quorum, to be elected and hold office as hereinafter provided.

"The above named persons shall be the board of trustees until their successors are elected and qualified at the annual meeting hereinafter provided.

"The said T. B. Beatty, Simon Ramberger, F. A. Druehl and J. B. Evans are hereby declared to be the trustees for a term of one year, or until the first annual meeting, the said Joseph Goshen, E. I. Goshen and W. Montague Ferry shall hold their offices for two years, or until the second annual meeting; the said W. H. Tibbals, M. H. Walker and J. D. Woods shall hold their office for three years, or until the third annual meeting.

"At the first annual meeting and every third year thereafter four trustees shall be elected to serve a term of three years. At the second annual meeting and every third year thereafter three trustees shall be elected to serve a term of three years. At the third annual meeting and every third year thereafter three trustees shall be elected, to serve a term of three years.

"How Vacancies Are Filled.

"The board of directors shall have power by a majority vote to fill vacancies in the board caused by resignation, death or permanent removal of a trustee from Salt Lake City, Utah, and the person elected to fill such vacancy shall hold office until the next annual meeting, or until his successor is elected and qualified.

"The members of the board of trustees shall qualify by each giving a bond to the incorporation, to be filed with the secretary thereof, in the sum of \$25.

"The officers shall be elected from the board of trustees by a majority vote of the trustees present, and shall hold their offices until their successors are elected and qualified.

"The first annual meeting of the corporation shall be held on the first Monday in October, 1905, and annually thereafter, at such time and place as may be designated by the president. The board of trustees may, by a majority vote, adopt a set of by-laws and may, by a like vote, amend the same.

"Methods to Become Members.

"The membership of this corporation shall be acquired as may be provided by the by-laws, and it shall be the duty of the board of trustees to provide in the by-laws for the manner of acquiring membership in the corporation, the qualifications, duties and obligations of members, and the removal of members; and shall also provide by the by-laws all necessary rules and regulations for the carrying out of the purposes hereof, and the board may create and fill such other offices, besides those above provided for, as they may from time to time see fit.

"At the annual meeting of this corporation the members shall, by a majority vote of those present, elect trustees to fill the vacancies caused by the expiration of the term of the trustees whose term of office has expired.

"All officers and trustees shall hold their offices until their successors are elected and qualified.

"The treasurer of this corporation shall, before he is qualified to act as such, execute a bond to the corporation with two sufficient sureties in the penal sum of \$5,000 for the faithful performance of his duties. The amount of said bond may be increased or diminished as may be provided by the by-laws of this corporation.

"This corporation is organized under section 342 of revised statutes of Utah, 1896, providing for the organization of corporations where pecuniary profit is not their object."

A resolution was adopted at the meeting authorizing the president to appoint a committee by-laws, to report at the next meeting, which will be held at such time and place as he may designate.

RENDERS REPORT OF YEAR'S WORK

Children's Aid Society Tells
What It Has Accomplished.

MOTHERS AND BABES HELPED

NEEDS OF ASSOCIATION ARE
YEARLY GROWING.

Following is the annual report of the superintendent of the Children's Aid and Home-finding association of Utah: Mr. President, Ladies and Gentlemen of the Board of Directors of the Children's Aid and Home Finding Association of Utah: Once more we meet to consider the great subject of "rescuing the homeless," and to elect our officers to do this highest and noblest of all humane work. Someone has said: "A man is never so great as when stooping to lift up a fallen brother." Our work goes further than that and saves before the brother falls. We save lives and carry joy to childless homes. There are many, many homes in Utah that need our aid. They do not need money, nor society, but they lack the smiles and sunshine of children to make a natural home. They need the children as much as the children need them. Many little ones who come into this world are perishing because there is no hand outstretched with motherly tenderness to save them. There is a missing link between these dying children and these childless homes, and our work is to link these two needy classes and benefit both.

Deserted Mothers Aided.

This past year has brought us in touch with many deserted mothers with babies in their arms, and this class we cannot turn away. In order to aid children we must honor motherhood. Nothing on earth is as noble as a true mother, and we appeal to us for aid need our care; some of them are living active, unselfish lives, working far beyond their strength to provide for their precious babies, which are the offspring of some vile wretch in human form, going around the country seeking whom he may devour.

Many mothers put children away because they are ashamed of their lives, and cannot obtain money. "The root of all evil," enough to live respectable lives. So with breaking hearts, as mothers alone can know, they offer their babies for adoption.

Will this association suggest some plan whereby motherhood shall be more honored, and true mothers can be able to keep their own children and live in a respectable manner?

Work During Past Year.

Since our annual meeting we have had fifteen children offered to us which we could not receive. Four of these babies have died since last May, and we are very and over this fact. Could we have taken them we believe they would be laughing and growing today, making joyous sunshine in four homes, instead of dying four little graves.

Our work in Utah has been crowned with great blessings, and we give humble, grateful thanks to Almighty God, the author of life, that he has kept the death angel from our home during the four and one-half years we have been tending here to save life. It gives us joy to say we have saved lives and made homes more happy.

We have helped the city, county and state to lessen their number of criminals; we have saved public funds; we have secured homes for youths that would otherwise have been sent to the reform school. We have received county charges and provided for them, removing them to good homes, where they are greatly loved.

Our work is far-reaching. We have had three cases which we took from the state of Nevada, two from California and three cases from Canada. We have taken four children from Salt Lake City to relatives in North Carolina.

We feel a great need of proper homes for boys. These restless, active boys must be cared for and have their energies turned to some useful occupation or tilde state, of which they form a part, will suffer in just the proportion that she neglects her boys. Will you, each and all, take the boys on your hearts, and help to provide homes, and wholesome employment for them?

When our last annual report was read to you we had seen children and two mothers at the this home. Since then we

have received thirty children and twelve mothers, of which eight were readmitted. Two mothers have been sent out of the state to relatives. We now have one baby and two mothers—both young—and three orphan girls in this home.

Comparative Standing of Home.

It was the privilege of your superintendent last winter to visit several institutions while in the east doing our line work.

In Minneapolis she found almost an ideal home. The home is a large, fire-proof building, carefully planned to meet the demands of the work, and is furnished with every convenience. A full corps of workers keeps the entire building clean and sweet.

As a natural result, the babies were sweet and healthy.

The sanitary conditions and healthfulness of this children's home in Minneapolis eclipses that of all the other institutions your superintendent has visited. That society, after years of ups and downs, is now on a good financial basis.

One party gave the site for the building and another gave \$30,000 for building purposes.

Local Society Tenders Thanks.

In submitting this report, we wish to tender our most sincere thanks to the many friends who have aided us and made it possible to do the work we report today. We tender sincere thanks to the various railroads that have granted favors. We thank the officers of St. Mark's hospital for receiving our sick. We thank the many who sent us help during the holidays, when we were overburdened with helpless children and deserted mothers—all in a destitute condition. We thank all who aided us in helping the helpless.

We extend our thanks to the Elks who have helped our ward, and have also given the inmates of this home the pleasure of a joyous day at the Lagoon.

We sincerely thank all who have helped us, and trust they have found "it is more blessed to give than to receive." We wish, however, to add, and we trust that with your help through the coming year, we may have the joy of doing a greater work.

Needs of Association.

Our Needs—We need to enlarge our borders to meet the growing demands that continually come to us.

Land and House—We need five acres of land and \$5,000 to build a home where children can be kept in a sanitary condition. In performing this work I have used 23 street car fares and traveled about 400 miles on the railroad.

Respectfully submitted this 13th day of November, 1904.

SALT LAKE CITY, Utah.

The report showed that \$1,347.23 had been received, of which \$1,270.42 was expended during the year. A balance of \$76.81 in the treasury was shown.

Tomorrow at 4:30 p. m., the newly elected directors will meet at the home of Mrs. Stickney, 11 Earl's court, for the purpose of choosing officers for the new year.

NEW YORK'S FLOWER SHOW.

Some 150 Varieties of Chrysanthemums Exhibited in Central Park.

There is a wealth of color in the exhibition of chrysanthemums which, with one 86 other flowers, opened Monday at the Central park conservatory. Fifth avenue and One Hundred and Fifth street. There were some 150 varieties of the beautiful blossoms, in all colors and shades, very evenly divided. A feature of the show was the mass of little daisy-like chrysanthemums which formed a border to the larger plants, extending around the sides and center of the north conservatory. These are small plants with many little daisy-like blossoms, the greatest number of a deep magenta pink, with here and there one of yellow or white.

Thomas Humphreys is the new chrysanthemum of the year; it is a beautiful rich terra cotta, with yellow under petals, which turn up to form a medium sized and very pretty blossom. Rider Haggard is an old friend with white petals and beautiful big sunflower-like center. Shavings is a funny little narrow, curled petioled flower in yellow and yellow and red, which looks half wilted; Silver Cloud is a big, creamy-white beauty, and the Petalums are sharp petioled blossoms which look like small hedgehogs. Acacias and genestas make a feathery blackgashy mass in the center of the big tree ferns and New Holland plants.

In the stove house adjoining the north greenhouse are the pitcher plants in which the children delight, and quite a crop of peanuts has been raised in the conservatory this year. A healthy plant on exhibition shows a mammoth peanut on the surface of the ground. Peanuts

are not tubers, they tell the children who inquire, but a fruit, a seed pod which in its last stages works itself into the earth. There are beautiful sensitive plants in this house, the foliage plants in green and white and red, a green and white plant, apple being one which is always interesting.

In the main greenhouse they have a small coffee plantation, raised since last year, and in the entrance one big coffee plant some eight feet high and in full fruit, good-sized pods, each containing a

double berry. In the rear corner of the main conservatory is the most valuable plant in the collection, a great Australian flame tree at least twenty feet tall and with a leaf resembling that of the pin oak. The tree was in blossom last month, showing brilliant flame-colored blossoms, which will not be seen again for another year. This plant is a fine specimen valued at \$1,000.

In the center of the house is the big royal palm tree, with a fountain of silver fountains on the trunk well below the

leaves, the fruit of the tree. There are enormous Chinese-fan palm trees, whose leaves would make fans for giants, a sugo palm with its husk-covered trunk, and an enormous banana tree, with a big bunch of half-grown bananas. These are the red variety. The leaves are seven and eight feet long.

Staghorn and elephant-ear ferns are always interesting in the fern house, and there is a new lot of orchids—the cat-crycia downiana, a cream top and rich crimson lip, a beauty, and a queer little

jeopard-spotted zygotopium "mackay," which is interesting.

Nothing is more beautiful than the tea roses in full blossom in the south greenhouse. These are trained across one end of the house—there, the petals tinted with deep yellow, pink, the petals tinted with deep yellow, and a large-petaled pure white blossom niphitus. President Palves of the park board has suggested many improvements in the plant work since he came into office. The exhibition will continue for a month.

Sale OF Rogers Silver

MONDAY, NOV. 14th.

\$12.50

WORTH OF

ROGERS
SILVER

FOR

\$7.50

Six Triple Plated Dinner Knives, \$2.25
Six Extra Plated Dinner Forks, \$3.00
Six Extra Plated Table Spoons, \$3.00

Nine Nations

Now Use Liquezone. Won't You Try It—Free?

Millions of people, of nine different nations, are constant users of Liquezone. Some are using it to get well; some to keep well. Some to cure germ diseases; some as a tonic. No medicine was ever so widely employed. These users are everywhere: your neighbors and friends are among them. And half the people you meet—wherever you are—know someone whom Liquezone has cured.

If you need help, please ask some of these users what Liquezone does. Don't blindly take medicine for what medicine cannot do. Drugs never kill germs. For your own sake, ask about Liquezone; then let us buy you a full size bottle to try.

We Paid \$100,000

For the American rights to Liquezone. We did that after testing the product for two years, through physicians and hospitals, after proving, in thousands of difficult cases, that Liquezone destroys the cause of any germ disease.

Liquezone has, for more than 20 years, been the constant subject of scientific and chemical research. It is not made by compounding drugs, nor with alcohol. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and fourteen days' time. The result is a liquid that does what oxygen does. It is a nerve root and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying; yet it is a germicide so certain that we publish

on every bottle an offer of \$1,000 for a nation, a constant user of Liquezone. The reason is that germs are vegetative; and Liquezone—like an excess of oxygen—is deadly to vegetative matter. There lies the great value of Liquezone. It is the only way known to kill germs in the body without killing the tissue, too. Any drug that kills germs is a poison and it cannot be taken internally. Every physician knows that medicine is almost helpless in any germ disease.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

Arthritis, Anemia, Hay Fever, Influenza, Quinsy, Kidney Diseases, La Grippe, Leucorrhea, Liver Troubles, Malaria—Neuralgia, Many Heart Troubles, Rheumatism, Scrofula—Syphilis, Skin Diseases, Stomach Troubles, Throat Tachies, Typhoid, Typhus, Tumors—Ulcera, Venereal, Women's Diseases.

All diseases that begin with fever—all inflammation—all catarrh—all contagious diseases—all the results of impure or poisoned blood. In nervous debility Liquezone acts as a vitalizer, accomplishing what no drugs can do.

50c Bottle Free

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquezone is and what it can do. In justice to yourself, please, accept it today, for it places you under no obligation whatever. Liquezone costs 50c and \$1.

CUT OUT THIS COUPON
For this offer may not appear again. Fill out the blanks and mail it to the Liquid Ozone Co., 433-441 Wabash Ave., Chicago.

My disease is I have never tried Liquezone, but if you will supply me a 50c bottle free I will take it.

Give full address. Write plainly.

Any physician or hospital not yet using Liquezone will be gladly supplied for a test.

Sleep for Skin-Tortured Babies
